

Software DISPO SW

DISPO SW

A tool for managing transmission lines between the radio houses

The Dispo SW package was designed to automatically manage audio lines between routers of different radio stations or to outside broadcasting sites. It realizes the following functions:

- Automatic time controlled connection of audio lines (bi-directional)
- Pre-programming of repetitive connections and exceptions for special dates or radio programmes
- Special rules for holidays
- Graphic display of the connections on a time axis
- Dynamic control of external players and recorders, including the generation of descriptive data
- Management of the user's access rights
- Printing of lists with the existing and the pre-programmed connections
- Detailed logging and archiving of all activities
- Free configuration of the colours, character types and data filters on the displays
- Export of the connection lists as XML files for their display in HTML pages
- Integration into the German ARD Sternpunkt line ordering system with comfortable management of pre-programmed connections and line requests

The screenshot displays the DISPO SW software interface. At the top, it shows the date and time: "Fr 17.01.2014 09:33:12". Below this, there are several tabs and a search bar. The main area is a table with columns for "H", "S", "A", "Art", "Titel", "Informant", "Kennziffer", "Beginn", "Ende", "B", "T", "Quelle", "Ziel 1", "Ziel 2", "Ziel 3", "N", "Empt", and "Tag". The table contains a list of scheduled connections, including programs like "Tagesschau 12:00 Uhr", "Pop zum Job", "Rück zum Job", "Mittagsmagazin", "RBB Aktuell", and "ZDF Heute". Each row is color-coded (green, red, or blue) and includes checkmarks in the "H", "S", and "A" columns. At the bottom of the interface, there are buttons for "Neue Schaltung", "Neue STP-Schaltung", "Bearbeiten", "Löschen", "Abschnittsbuchung", "Rücklog/Konferenz", and "Technikaufrag".
